

Dear Sir / Madams

PicknBuy24.com

Buy Japanese cars online!

News Release

25th Nov 2008 No. 000008

AGASTA CO., LTD. (Listed: TSE #3330)

Japanese used car online shop PicknBuy24.com, now powered by 2,000 Car Dealers. Estimating huge increase of their stock.

PicknBuy24.com, a Japanese used car online shop (URL: <http://www.picknbuy24.com>, operated by AGASTA CO., LTD. listed on the Tokyo Stock Exchange,) has announced they have tied up with Fabrica Co., Ltd, a major Japanese used car dealers chain. Fabrica manages database of over 70,000 units from 2,000 car dealers throughout Japan and has built the system of exporting the car database to PicknBuy24.com.

See PicknBuy24.com with stock of Japan car dealers' network. >> <http://www.picknbuy24.com/>

PicknBuy24.com lines a wider variety of Japanese cars from major car dealers' network.

PicknBuy24.com selects and uploads items that would suit worldwide customers' demands, out of Fabrica's database from their experience of overseas sales.

Misa Matsuzaki (CEO of AGASTA CO., LTD. PicknBuy24.com's operating company) assumes the more items are uploaded, the more website users will be expected. Japanese used cars are highly demanded as of its low mileage and high quality. Japanese people tend to drive only 8,000 km in average according to Japan's road situation. Matsuzaki analyzes that collecting the total database of Japanese used cars would interest more car buyers all over the world, as there are approximately 4 million units of used car registered per year (in 2007, as of Japan Automobile Dealers Association).

Renewed PicknBuy24.com has new features in search functions, dress up options, and mechanical check system. Matsuzaki seeks the opportunity to provide users with an access to a larger stock, wider choice and improved condition in searching a Japanese car through PicknBuy24.com. The company is looking to tie up with other new partners to upload more cars on the website.
